Informit TVNews

This guide illustrates how to search, download and track news stories of interest.

Enter a search in the Simple search field, tick Video only and click on Search. Note: if you have a TVNews subscription Video only will be ticked automatically.
Your search results will be displayed, from here you can select titles to review.

Click on the title.

This will display an abstract for that video record. You can then select Back to list of items to view the full list of programs aired on that particular date.

These are the programs shown for 19 November 2013 for ABC News NSW.
Select Back to issues for a list of all aired programs via date for this source, e.g. ABC News NSW.

You can now select any program by date by selecting the date you require.
When you come to view the video, a notice will appear as a reminder that the video can only be used by Screenrights members for educational purposes only. Select OK.

The video will open and begin to play. The buffering time will vary depending on your internet connection.

Note the citation message at the top of the screen.

Click on Save video to download.

If you have any questions or feedback please contact the Customer Support Team at support.informit@rmit.edu.au.
